IMPACT: Improving Management of Patients with Advanced **Colorectal Tumours**

Chief Investigators: Miss Deena Harji (deena_harji@hotmail.com) and Miss Abigail Vallance (a.e.vallance@gmail.com), Miss Nicola Fearnhead Co-Investigators: Mr Richard Wilkin, Dr Claire Taylor, Dr Gabby Thorpe, Mr Ian Jenkins, Mr Ben Griffiths, Professor Eva Morris, Mr Kenneth Elavia, Dr Jenny Seligmann, Miss Helen Mohan, Mr Michael Duff, Mr Martyn Evans.

Incidence of Advanced and Recurrent Rectal Cancer

Locally Advanced Rectal Cancer		ŤŤŤŤŤŤ
Locally Recurrent Rectal Cancer	ŤŤŤŤŤŤŤ	ŤŤŤŤŤŤ

- > 14,000 new cases of rectal cancer are diagnosed per annum in the UK.
- **10%** of patients present with locally advanced rectal cancer per annum.
- Between **5-10%** of patients present with locally recurrent rectal cancer per annum following previous curative resection.

IMPACT PRIORITIES

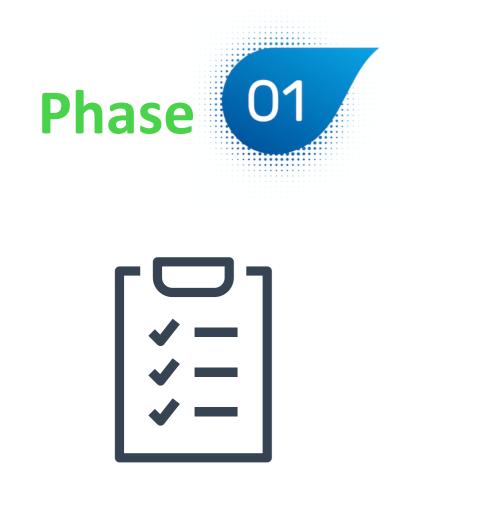

PRIORITY

To identify current MDT referral and management pathways for patients with LARC and LRRC in the UK and Ireland.

Methodology

IMPACT AUDIT OBJECTIVES

- To identify compliance with current national and international guidelines.
- > To identify regional and national referral patterns for patients with LARC and LRRC in the UK.
- To assess short term clinical and treatment related outcomes.
- > To assess long term oncological outcomes including overall survival, local recurrence rates, metastatic disease rates.

Organisational Survey

Organisational survey to all

hospitals in England and Wales

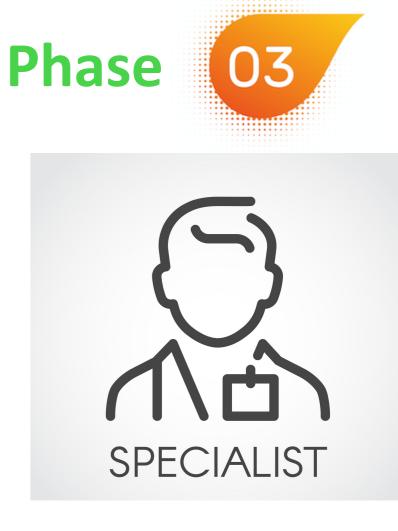

through National Bowel Cancer

Audit and to all hospitals in

Ireland and Scotland.

Data linkage with **CORECT-R** dataset

National Audit of MDT Decision Making A multi-centre, prospective audit of ALL consecutive patients with newly diagnosed LARC or LRRC over a 6 month period across ALL MDTS in the UK and Ireland over

Data linkage with the **COloRECTal Repository** (CORECT-R). CORECT-R links a number of datasets across colorectal cancer and will provide us short-term (12 months) and longer term (5 year) outcome data

Audit of Surgical Decision Making in LARC and LRRC

A multi-centre, prospective audit assessing surgical decision making by MDTs in centres who offer surgery for LARC and/or LRRC over a 6 month period.
