

# Specialty Skills in Coloproctology

The focus of the course is the evaluation and treatment of benign anorectal diseases, pilonidal disease and stoma surgery, as well as operative procedures on the abdominal colon including right and left colectomy and Hartmann's procedures.

## Course content includes

- Anatomy of the anal canal, pelvic floor and rectum
- Evaluation and Treatment of pilonidal disease
- Stoma Complications
- Anatomy of the abdominal colon
- Management of anastomotic complications

## Delegate feedback

'The anatomy e-learning modules were the best. You learn to the point and the detail you really need to know. Really good tips given from the faculty during the cadaveric colonic resections.' February 2015

## Who should attend?

ST3-5 and SAS Grades

## Why take this course?

'Mapped to the ISCP, this course lays the foundation to make confident progression in a colorectal career.'
