

MASTER OF SURGERY IN COLOPROCTOLOGY

Study for a UK Clinical Masters from Britain or overseas (MS/MCh)

Overview

An outstanding modular course designed specifically for surgical professionals advancing in coloproctology. The course combines in-depth clinical and surgical modules with leadership and research to provide a complete approach to coloproctology practice. The realistic content provides trainees and consultants with relevant credentials in this important surgical field.

The immersive interactive format covers all aspects of coloproctology, strengthening clinical knowledge, critical thinking and decision making skills. The course is delivered entirely online within a thriving learning community, facilitated by consultants in; colorectal surgery, gastroenterology and oncology.

This flexible course, offers a challenging but rewarding educational experience from start to finish and is tailored specifically around the working lives of busy surgical practitioners. Participation requires no travel or GMC registration and is therefore accessible worldwide.

All assessment is undertaken online and accreditation is awarded based on both online participation and completion of summative assessments. You can accrue credits from standalone modules leading to an MS/MCh in Coloproctology.

Qualifications Available

3 modules (60 credits): Postgraduate Certificate
6 modules (120 credits): Post graduate Diploma
6 modules + dissertation: Master of Surgery Degree (MS/MCh) in Coloproctology

Information provided here is subject to change. This course is planned to run from January 2019.
