Aimed at consultant colorectal surgeons, surgical trainees and colorectal nurse specialists, this course will bring together national and international expertise to present and debate the latest evidence and techniques.

Led by Mr Ian Daniels and Mr Neil Smart (Royal Devon and Exeter Hospital), the faculty will include: Professor Antonio Longo (Italy), Professor David Jayne (Leeds), Mr Pasquale Giordano (London), Mr Nader Francis (Yeovil); plus more to be confirmed

Aims for the course:

- Provide an overview of the anatomy and pathophysiology of specific benign conditions
- Detail the up-to-date evidence for the various treatment options
- Spotlight specific clinical trials
- Foster debate between the expert faculty and the audience
- Suggest potential future treatment modalities
- Examine the role of Health Technology Assessment in guiding future practice

Specific conditions to be covered during this symposium:

- Fistula in ano
- Haemorrhoids (Grade 3 -4)
- Anal Intraepithelial Neoplasia (AIN)

Consultants: £175

Trainees: £150

AHP: £75
