Introduction from the Course Director

Dear Colleagues,

I would like to welcome you to our 8th Portsmouth Endoscopy Symposium bringing you updates on the very latest advances of gastrointestinal endoscopy techniques and technology. We aim to cover all the hot topics discussed in recent international meetings. This BSG endorsed two day meeting is designed to be engaging and interactive. This year, we are pleased to introduce a series of state-of-the-art lectures themed ‘New Horizons’ with national and international experts presenting the latest in their field. The venue for this event is in the exciting ‘Action Stations’ at the Portsmouth Historic Dockyards. It is very spacious and registration also gives you access to activities such as rock climbing (www.actionstations.org) in case of endoscopy overload. There is plenty of parking (charges apply) available nearby and it is also close to Portsmouth Harbour train station.

I am delighted to be joined by a highly distinguished panel of national and international speakers who have given up time in their busy schedule to share their wealth of experience and knowledge.

The exchange of ideas and discussions can continue at the course dinner which is held at an exciting venue. It is a great opportunity to wind down and meet the faculty and delegates informally.

Finally, I hope you enjoy the symposium and I look forward to welcoming you in Portsmouth.

With kind regards,

Pradeep Bhandari
